

New Seller Registration

Step-by-step guide for users who have not yet registered on Reli.one or are ready to create a separate seller account with a new email address.

Version: June 2026

1. Choosing an account type

Reli.one has **two independent account types**: buyer and seller. If you want to sell products, choose **Become a seller** during registration, not “Sign up as a buyer”.

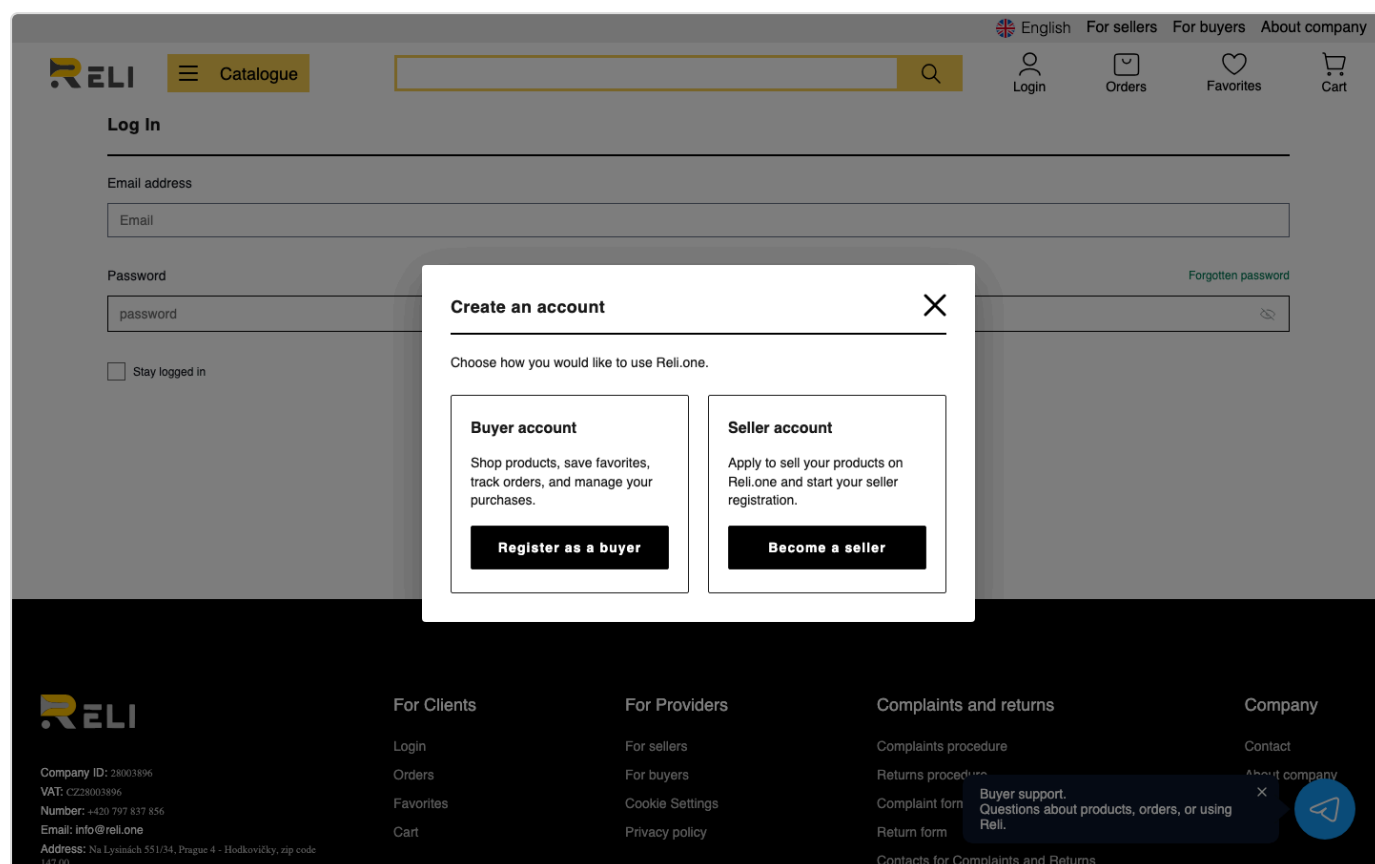

Fig. 1 — Account type selection dialog during site registration

Direct link for seller registration: <https://reli.one/seller/create-account>

2. Creating a seller account

Step 2.1 — Complete the registration form

Open the seller registration page and enter:

- first and last name;
- email (used for login and notifications);
- phone number;
- password and password confirmation.

Password requirements:

- at least 8 characters;
- at least 1 uppercase letter;
- at least 1 digit;
- at least 1 special character from !@#\$%^&*.

Check the box to agree to the terms and privacy policy, then click **Sign Up**.

Fig. 2 — "Create Your Seller Account" page

Step 2.2 — Confirm your email

A 6-digit code will be sent to the email address you provided. Enter it on the confirmation page. If you do not receive the email, check your Spam folder or request a new code.

Verify your email

A 6-digit verification code was sent to
seller@example.com

Step 2 of 6

Confirm

Resend code in 59 s

Fig. 3 — Email confirmation (OTP)

3. Seller onboarding

After email confirmation, the seller verification process (onboarding) begins. You must complete it fully before you can list products.

Step 3.1 — Choose seller type

- **Self-employed / sole proprietor** — sole trader, self-employed person, or individual engaged in business activity;
- **Company / legal entity** — legal entity (company).

The data and documents requested depend on the type you select.

Choose your seller type

Select the option that best describes your business

Step 3 of 6

Self-employed / sole proprietor

For individuals running a small business or operating independently

Company / legal entity

For officially registered companies and legal entities

Fig. 4 — Choosing type: sole proprietor or company

Step 3.2 — Autofill by IČO via public registry (for Czech sellers)

If your company or business activity is registered in the **Czech Republic**, Reli.one can pull some legal and tax data from the **public registry** using your **IČO** number.

This is an optional helper feature. You can always click **Fill manually** and enter data without querying the registry. Autofill does **not replace** document uploads or manual review of your application.

What is IČO

IČO (Identifikační číslo osoby) is an 8-digit identification number for a legal entity or entrepreneur in the Czech Republic. Before querying the public registry, the system validates the IČO format and checksum. An invalid number is not sent to the registry.

Where the feature is available

Seller type	Where in the interface	Load button
Company / legal entity	Page https://reli.one/seller/seller-company — a modal dialog appears on first visit; later the "Company information" block	<i>Load from public registry</i>
Self-employed / sole proprietor	Page https://reli.one/seller/seller-info — a modal dialog appears on first visit; later the "Tax information" block	<i>Load from public registry</i>

Step by step: company (Company)

1. Select type **Company / legal entity** and go to <https://reli.one/seller/seller-company>.
2. On first open, a **"Prefill Czech company legal data"** dialog appears.
3. Enter a Czech IČO (8 digits) and click **Load from public registry**.

4. Review the **Public registry preview** block: name, IČO, legal form, registered address, DIČ hint.
5. Click **Apply to onboarding** — data is copied into the form (empty fields only).
6. If needed, repeat the load in the Company information block with **Load from public registry**, then **Apply to form**.
7. If the public registry returned representative data, the preview may show a **Representative suggestions** block — click **Apply representative** to fill in name and role (data remains editable).
8. Correct any errors manually, complete remaining fields, and continue onboarding.

The screenshot displays the RELI Seller onboarding interface. A modal dialog titled "OPTIONAL COMPANY ASSIST" is centered on the screen, with the sub-header "Prefill Czech company legal data". The dialog text states: "For companies registered in the Czech Republic, we can load part of the legal company data from the public registry using your IČO. Manual filling is always available." Below this, a light blue box contains the text: "This only helps with company legal details and registered address. Phone, bank details, representatives, warehouse, return address and documents still stay manual and editable." The dialog has two buttons: "Load from public registry" (dark blue) and "Fill manually" (light blue). In the background, the onboarding form is visible with fields for "Company name", "Official registered address", "Company name is", "Legal form", "Country of registration", "Business ID", "Trade register number", "TIN (Tax Identification Number)", and "EORI". The "Business ID" field is highlighted with a red border and a message "Business ID (IČO) is required". The "TIN" field contains the value "987654321" and has a message "TIN is required". The "EORI" field has a message "If importing into EU".

Apply representative

Fig. 7 — Public registry preview and "Apply to form" button in the Company information block

Step by step: sole proprietor / self-employed (Self-employed)

1. Select type **Self-employed / sole proprietor** and open <https://reli.one/seller/seller-info>.
2. On first visit, a **"Prefill Czech business/tax details"** dialog appears.

3. Enter IČO and click **Load from public registry**.
4. Review the preview: registry name, IČO, registered address, DIČ/TIN hint.
5. Click **Apply to onboarding**.
6. The same actions are available in the **Tax information** block: IČO field → **Load from public registry** → **Apply to form**.
7. Complete personal data, documents, bank details, warehouses, and addresses manually.

The screenshot shows the RELI Seller onboarding interface. A modal dialog titled "OPTIONAL SELF-EMPLOYED ASSIST" is open, featuring the heading "Prefill Czech business/tax details". The dialog explains that if the user is registered in the Czech public registry, business and tax details can be loaded from ARES using their IČO. It includes a disclaimer: "This is public-registry prefill only, not identity verification. It can help with IČO, tax country, DIČ/TIN hint and registered address. Phone, bank details, warehouse, return address and documents stay manual and editable." Below this, there is a "Business ID" section with a text input field labeled "Enter Czech IČO". Two buttons are present: "Load from public registry" (highlighted in dark blue) and "Fill manually" (light blue). In the background, the onboarding form is visible, showing fields for "First name" (with "Jan" entered), "Date of birth" (format dd.mm.yyyy), "Phone" (+420123456789), "Nationality" (a dropdown menu), and "Identity document" (with "Passport" selected and checked). An "Upload document" button is at the bottom of the form.

OPTIONAL SELF-EMPLOYED ASSIST

Prefill Czech business/tax details

If you are registered in the Czech public registry, we can load part of your business and tax details from ARES using your IČO. Manual filling is always available.

This is public-registry prefill only, not identity verification. It can help with IČO, tax country, DIČ/TIN hint and registered address. Phone, bank details, warehouse, return address and documents stay manual and editable.

ADDRESS

Street *
Main street 123

Fig. 10 — Preview in the Tax information block and "Apply to form" button

Fields the public registry can fill

Public registry data	Company	Sole proprietor / self-employed
Name (obchodní jméno)	Company name	Registry name (reference only)
IČO	Business ID (IČO)	IČO
Legal form	Legal form	—
Country of registration	Czech Republic (CZ)	Tax country = CZ
Registered address (street, city, postal code)	Company address	Address (tax block)
DIČ (hint)	TIN / DIČ	TIN (as hint)
Representative (name, role)	Representative (hint)	—

DIČ from the public registry is only a hint. This is a tax identifier from the registry; it does **not confirm** VAT payer status (DPH/VAT). Verify DIČ/TIN and correct it manually if needed before submitting your application.

What the public registry does not fill (enter manually)

- phone and email (except those already provided during registration);
- bank details (IBAN, SWIFT/BIC, account holder);
- for a company — full representative personal data (date of birth, citizenship) if the hint was not applied;
- shipping warehouse address;
- returns address;
- uploaded documents (ID, company extract, proof of address, etc.).

Errors and special cases

Situation	What to do
Invalid IČO format	Correct the number (8 digits, valid checksum) and retry the request
IČO not found in the public registry	Continue filling the form manually — this is a normal scenario
Public registry temporarily unavailable	Try again later or fill all fields manually
Warning <i>Inactive company / Inactive registry record</i>	The entity is inactive in the registry (e.g., liquidated). Verify IČO; the application still goes through manual review
DIČ "Derived from IČO"	The registry did not return DIČ — the system suggested a computed value. Always verify the value

After submitting your application (**Submit for Verification**), the backend additionally cross-checks data against the public registry and stores the result as a **hint for the moderator**. This does not replace manual review: application status remains *Pending verification* until the Reli.one team decides.

Limitation: at present, public registry autofill works for entities registered in the **Czech Republic**. For other countries, fill the form manually.

Step 3.3 — Complete your details and upload documents

For self-employed / sole proprietor, the system will sequentially request:

1. personal data (date of birth, citizenship, phone);
2. tax information (country, TIN, IČO if applicable);
3. address;
4. bank details (IBAN, SWIFT/BIC, account holder);
5. shipping warehouse address;
6. returns address;
7. documents (ID, proof of address, etc.).

Accepted document formats: PDF, JPG, PNG. Maximum file size — 10 MB.

The screenshot shows a web interface for a seller's verification process. At the top, there's a header with the 'RELI / Seller' logo on the left and 'Logout' and 'Language' links on the right. The main section is titled 'Seller information' with a subtitle 'Please provide all required information for verification'. Below this, a progress indicator shows 'Step 4 of 6'. The form itself is titled 'PERSONAL DETAILS' and contains several input fields: 'First name' (filled with 'Jan'), 'Last name' (filled with 'Novák'), 'Date of birth' (with a calendar icon and placeholder 'dd.mm.yyyy'), and 'Phone' (filled with '+420123456789'). There's a 'Nationality' dropdown menu currently showing 'Select nationality'. Below that, under 'Identity document', there's a section 'Selecting a document' with three radio button options: 'Passport' (which is selected and has a green checkmark), 'Driver's license', and 'National ID'. At the bottom of the form, there's an 'Upload document' button with a file icon and text '(PDF, JPG, PNG - Max 10MB)'.

Fig. 11 — “Seller information” form (details and documents)

Step 3.4 — Review your data and submit the application

On the review screen, make sure all sections are filled in correctly, then click **Submit for Verification**. Application status changes to *Pending verification* — awaiting administrator decision.
