

Already Registered as a Buyer

What to do if you created a buyer account and now want to sell on Reli.one.

Version: June 2026

1. What the issue is

On Reli.one, **buyer** and **seller** accounts are different account types with different permissions. Buyer registration creates a user with the *Customer* role; to sell, you need the *Seller* role and completed onboarding (verification).

Important: the same email address **cannot** be used twice. If you already registered as a buyer, the form at <https://reli.one/seller/create-account> will return the error “user with this email already exists”.

The screenshot shows the Reli.one website interface. At the top, there's a navigation bar with the Reli logo, a 'Catalogue' button, a search bar, and links for 'English', 'For sellers', 'For buyers', and 'About company'. Below the navigation bar, there's a 'Log In' section with fields for 'Email address' and 'Password', and a 'Stay logged in' checkbox. A 'Forgot password' link is also present. In the center, a 'Create an account' modal is displayed, asking the user to choose how they would like to use Reli.one. The modal has two options: 'Buyer account' and 'Seller account'. The 'Buyer account' option describes shopping products, saving favorites, tracking orders, and managing purchases, with a 'Register as a buyer' button. The 'Seller account' option describes applying to sell products, starting seller registration, and starting a seller registration, with a 'Become a seller' button. The footer contains contact information for Reli.one, including company ID, VAT, number, email, and address. It also has links for 'For Clients', 'For Providers', 'Complaints and returns', and 'Company'.

Fig. 1 — During registration, choose “Become a seller”, not buyer

The image shows the 'Register here' form on the RELI website. The header includes the RELI logo, a 'Catalogue' button, a search bar, and navigation links for 'English', 'For sellers', 'For buyers', and 'About company'. Below the header, the registration form is centered. It contains input fields for 'First name', 'Last name', 'Email*', 'Phone*', 'Password', and 'Password confirmation'. There is a checkbox for 'You agree to the rules' and a 'Sign up' button. A 'Buyer support' chat bubble is visible on the right side of the form.

2. What happens when you try to log in as a seller

Seller dashboard login is at <https://reli.one/seller/login>. Your buyer account password may work for authentication, but seller onboarding and seller features **will not open** until the account has the Seller role.

The image shows the 'Log in to seller panel' page. The header includes the RELI logo and 'Seller' text, along with 'Logout' and 'Language' links. The main content area is a light blue gradient. In the center, there is a white login form with input fields for 'Email' and 'Password', a 'Log in' button, and a 'Forgot your password?' link. Below the form, there is a link for 'Don't have an account? Sign up here'.

3. Options

Option A — Contact support (recommended)

Email **office@reli.one** with the subject *“Convert account to seller”* and include the email address you used to register as a buyer.

Email template:

Hello,

I registered on Reli.one as a buyer, but I would like to sell products on the platform.

Account email: *your@email.com*

Please help convert my account to a seller account or advise on next steps.

Best regards,

First Last

The support team will manually assign the seller role and create a Seller profile. After that, you can log in at <https://reli.one/seller/login> and complete onboarding with the same email.

Option B — Register a seller with a different email

Create a new seller account with a **different email address**:

1. Open <https://reli.one/seller/create-account>;
2. Register as a seller;
3. Complete onboarding following the “New Seller Registration” guide.

Your buyer account on the old email remains — you can still place orders from it. Sales will be handled from the new seller account.

Option C — Delete the buyer account and register again

Warning: deleting your account will remove order history, favorites, and other data linked to your buyer profile. Use this option only if you have no active orders and are sure about your decision.

1. Delete the account in profile settings (**Delete account**) or contact support;
2. Wait for deletion confirmation;
3. Register as a seller with the same email: <https://reli.one/seller/create-account>.

Fig. 4 — Account deletion: via profile or by request to support

4. Comparing options

Option	Same email	Order history	Speed
A — Support	Yes	Preserved	1–2 business days
B — New email	No	Preserved on old account	Immediately
C — Delete + register	Yes	Lost	Depends on deletion

5. After receiving the seller role

Regardless of the option you choose, you will need to:

1. Log in at <https://reli.one/seller/login>;
2. Complete onboarding (seller type → details → documents → submit application);
3. Wait for approval;
4. Start listing products (see the “Listing Products” PDF).
